Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

ART REJECTION:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rashid(5,905,457).

-- In considering claim 28, the claimed subject matter that is met by Rashid includes:

1) the sending to an evaluation unit from a sensor used for blind spot detection, a signal representing a distance between a moving object and a vehicle of a driver is met by the sensors(16,18) sending distance signals to control system computer(30)(see: column 5, lines 10-42);

2) the determining a relative velocity and switching on a warning device is met(see: column 7, lines 26-58).

- Rashid does not show:

- 1) the detecting a moving object in a case of maneuver of leaving a parking gap;
- 2) informing the driver of the moving object moving at an angle to the vehicle.

Although not specifically taught by Rashid, it would have been obvious that the system would have been readily utilized in a case of maneuver of leaving a parking gap,

since Rashid teaches detecting moving objects in any case, and therefore leaving a parking gap would have also been readily detected.

Furthermore, since the device would have included side detectors as well as front and rear detectors, the signals from these detectors would have readily informed the driver of an object moving at an angle to the vehicle.

Allowable Subject Matter

3. Claims 15-27 are allowed.
